

2020 Yale Mossman Fellowship in elementary particle theory

The Yale University Physics Department invites applications for the Yale Mossman Postdoctoral Fellowship, which is intended to support promising physicists in the early stages of their careers.

This year's fellowship will be in elementary particle theory, broadly defined. The fellowship will provide a 3-year appointment with a competitive stipend and a discretionary research fund.

Yale has an active theory community in the fields of elementary particles, condensed matter, and related fields, and a strong involvement in ATLAS and experiments at the intensity and cosmic frontier. Yale and New Haven together provide enriching scholarly and extracurricular activities. Yale strongly welcomes applications from women, persons with disabilities, protected veterans, and underrepresented minorities. Yale is an Affirmative Action/Equal Opportunity Employer.

For inquiries, please contact walter.goldberger@yale.edu.

Apply at physics.yale.edu/yale-mossman by November 1, 2019.
