

Astrophysics Symposium

Yale Physics

Yale Astrophysics Symposium

January 26, 2023 9:30 a.m. in SPL 57

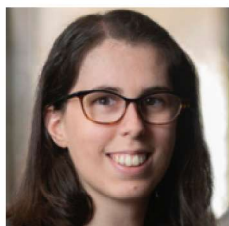

Coffee will be served beginning at 9:00am

9:30-10:30 am

ChangHoon Hahn
Princeton University

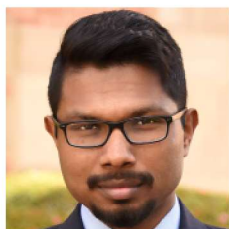

Probing Dark Energy and Neutrinos with 40 Million Galaxies

10:30-11:30 am

Elena Massara
University of Waterloo

Cosmology with Galaxy Surveys

11:30 am - 12:30 pm

Anowar Shajib
University of Chicago

At the intersection of Astrophysics and Cosmology: strong lensing by galaxies as a probe of the Hubble constant

January 27, 2023 9:30 a.m. in SPL 57

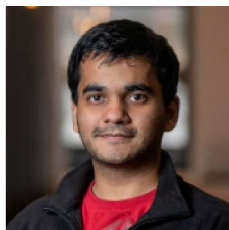

Coffee will be served beginning at 9:00am

9:30-10:30 am

Chiara Mingarelli
University of Connecticut and Flatiron Institute

Taking the pulse of the Universe

10:30-11:30 am

Chirag Modi
Flatiron Institute

Forward Modeling approaches for Cosmological Analysis

11:30 am - 12:30 pm

Rohan Naidu
MIT

The First Glimpse of the First Galaxies with JWST
