

Physics Club

physics.yale.edu/events/physics-club

The colloquium series of the Yale Physics Department is called the Physics Club. It is a weekly colloquium of general interest to the Department of Physics, as well as Applied Physics, Astronomy, and Mathematics. The series is aimed at graduate students, postdoctoral researchers, research staff and faculty.

Prize Lectures

physics.yale.edu/prize-lectures

The Yale Physics Department sponsors prize lectures in physics, bringing distinguished scientists to Yale to present results of frontier research and interact with our faculty, research staff, and students. These annual lectures are of general interest to the Department of Physics, as well as Applied Physics, Astronomy, and Mathematics. The prize lectures are aimed at graduate students, postdoctoral researchers, research staff and faculty.

There are six prize lectures in the department:

Leigh Page Prize Lectures

General distinguished lecturer: range of topics and speakers in physics

Hanan Rosenthal Memorial Lecture

Distinguished atomic physics lecturer: topics and speakers in AMO

Miller-Breit Memorial Lecture

General distinguished lecturer: range of topics and speakers in physics

Vernon W. Hughes Lecture

General distinguished lecturer: emphasis on nuclear and particle physics

Howard L. Schultz, Sr. Prize Lecture

General distinguished lecturer: invitation from the Society of Physics Students

Beatrice Tinsley Prize Lecture

General distinguished lecturer, emphasis on distinguished women scientists: joint invitation from the Society of Physics Students (SPS), Women in Physics (WiP), and the Department of Astronomy
